

Izabella Pavlushko

Izabella Pavlushko is a contemporary abstract artist.

For over 10 years she has been working in the style of geometric abstraction and exploring the potential of geometry in art. In her work she connects geometry with spirituality and creates forms that would provide the same emotional power as a musical composition.

All works of Izabella Pavlushko form a matrix of our objective reality and perception. They are as mysterious and incomprehensible as the geometry of the Pyramids.

Complex multi-plane composition, novelty of color interpretation of an action, and a high level of skill attract the audience and connoisseur of art. Her paintings expose the essence of things. The whole compositions, like Mozart's music is dictated by the highest natural forces.

Izabella's paintings can be found in private collections across Europe and the USA.

During the past 10 years she took part in diverse International exhibitions in the USA, Australia, Poland, Italy, Spain, Portugal and so on.

Many of this artist's work can also be considered as design for stained glass windows and mosaics because they are monumental.

Interiors of halls, restaurants and offices can be decorated by these works. They are original and carry a complex charge of esthetic satisfaction, offering a welcome relief from day-to-day stress and a connection to good spirit and energy.

Izabella Pavlushko is a member of the international group of independent artists, 3rd Paradigm
